35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

The object when first sighted appeared like a bright satellite traveling somewhat faster than any I have seen. In a S.S.W. direction & up in relation to a star clearly visible and in the same visual position.

Then it seemed to change direction and return almost straight to me as I was driving South on Bubbs Rd. I turned West on Terrace Drive the object seemed to turn with me but continue to come closer & slow down. As it slowed the vapor trails or whatever increased in size & length until they appeared to cover a city block - 220'.

I turned South on Terra Bella Dr - the object went out of my vision. I stopped in front of my house - walked to the corner & watched it disappear from sight over the horizon. The appearance at that time was the same as when first sighted.
